Skin: Prolonged or repeated contact may cause irritation. May aggravate existing skin conditions.

Inhalation: Mist can cause irritation of nasal and respiratory passages. Abusive or excessive inhalation may cause irritation to the upper respiratory tract, dizziness, nausea, central nervous system effects, fibrosis, and reduced pulmonary function.

Ingestion: Minimal toxicity. May cause nausea, vomiting, and/or stomach discomfort. Possible aspiration hazard, may cause inflammation of the lungs.

4. FIRST AID MEASURES

Eyes: Flush with plenty of water for at least 15 minutes while holding upper and lower lids open. If irritation persists call a physician immediately.

Skin: Wash with soap and water. If irritation persists call a physician.

Inhalation: Remove to fresh air immediately. Apply artificial respiration if necessary. Call a physician immediately.

Ingestion: DO NOT induce vomiting. Call a physician immediately. Aspiration into lungs during vomiting may cause chemical pneumonitis. If vomiting occurs, have victim lean forward to reduce risk of aspiration.
