

**United 757**

# NEEM-BAC

## Gelled Drain Treatment

Keep drains running freely *and* free of drain flies with the dual protection of this Earth Smart® drain maintenance formulation.

**NEEM-BAC** is designed to provide the natural, combined protection of several bacterial strains and Neem oil in a gelled formulation that provides the bacteria the surface contact time it needs to implant itself into the build-up found in drains.

**NEEM-BAC's** multiple strains of bacteria work to eliminate the build-up by degrading:

- Organic solids
- Proteins
- Starch
- Cellulose
- Grease

Neem oil has been used for many applications and for thousands of years in India. It is derived from the seeds of the tropical Neem tree. In **NEEM-BAC** the oil coats the surfaces of drains and starves drain flies by eliminating their food source. This eliminates infestations.

**NEEM-BAC** is safe and easy-to-use. Simply pour or spray **United 757** into your drains as part of a regularly scheduled drain maintenance program for best results.

**This Earth Smart® formulation contains no:**

- Solvents
- Nonylphenol ethoxylates (NPE)
- Surfactants
- Added fragrance

Put **NEEM-BAC** to use in:

- Floor drains
- Drain lines
- Restrooms
- Portable Toilets

Secondary applications for **NEEM-BAC** include controlling the greasy build-up and insect food sources often found in refuse collection areas. Treat garbage chutes, dumpsters, garbage cans and more to provide the dual protection of **NEEM-BAC**.
