United 282

Very Useful for Disinfecting and Saniﬁng Surfaces

Kills: SARS-CoV-2 (COVID-19 virus) and for HBV and HCV

Ready-To-Use

INERT INGREDIENTS:

ANATOMICAL SURFACES: floors, walls, and other exteriors

KILLS HIV-1; HBV and HCV on Pre-Cleaned Environmental Surfaces; Objects Previously Soiled with Blood/Blood Fluids in health care settings (Hospitals, Nursing Homes and other facilities) in the presence of 5% blood serum and a 30-minute contact time. KILLS HIV-1 (associated with AIDS), HBV, and HCV (see label instructions). Kills on hard, non-porous inanimate surfaces when allowed to remain wet for at least 5 minutes.>

Fungicides

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Use with adequate ventilation. Avoid contact with eyes. Wash thoroughly with water and soap after handling and before eating, drinking, chewing gum or using tobacco.

FIRST AID

If inhaled: Hold patient's nose and mouth closed and gently wave for 15 to 20 minutes. Remove contact lenses, if present, after the ﬁrst 5 minutes, then continue rinsing eye. Call a poison control center or doctor for further treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a quart of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor.

If on skin: Wash skin with soap and water, or wash clothing, if on clothing. Remove all contaminated clothing before loosening any rings, buttons, or other clothing closures and proceed with mechanical removal or loosening. Follow your State Pesticide or Environmental Control Agency, or the Regional EPA Oﬃce for guidance.

NOTE TO PHYSICIAN

If the product container or label with you when calling a poison control center or doctor, or going to a hospital emergency department.

If inhaled: Remove patient from contact with all irritants, or remove patient to a fresh air environment. Artificial respiration, preferably by mouth to mouth, if possible. Call a poison control center or doctor for further treatment advice.

If swallowed: Call a poison control center or doctor immediately for treatment advice. Give 1 to 2 cups of milk or water for oral rinsing if the substance is a liquid. Do not give anything by mouth to an unconscious person.

If inhaled: Get the patient to fresh air. Do not give anything by mouth to an unconscious person.

If inhaled: If at all possible, have the patient breathe into a paper bag; if there is no bag, have the patient breathe in and out of a paper towel or in and out of the mouth of another person.
United 282 is designed specifically as a general, non-toxic, ready-to-use, non-汲取able cleaner and disinfectant for use on hard, non-porous surfaces in hospitals, nursing homes, patient rooms, operating rooms, ICU areas, shower rooms, locker rooms, public restrooms, schools, food processing plants, food service establishments (restaurants, commercial kitchens), transportation terminals, offices, buildings, manufacturing facilities, lodging establishments, retail businesses, veterinary clinics, pet shops, animal and bird science laboratories and animal/recreational facilities where housekeeping is of prime importance in controlling the hazard of communicable contamination. It is formulated to disinfect hard, non-porous, inanimate environmental surfaces: floors, walls, metal surfaces, stainless steel surfaces, glazed porcelain, ceramic tile, plastic surfaces, chrome, brass, copper, laminated surfaces, baked enamel surfaces, bathrooms, shower stalls, bathtubs, and cabinets.

For plastic and painted surfaces areas before use. May be used in the kitchen on counters, sinks, appliances, and countertops. A rinse with water is required for surfaces in direct contact with food. United 282 disinfects those areas that generally are hard to keep free from staining, such as garbage storage areas, empty garbage bins and cans, basements, bathrooms and other areas which are prone to being contaminated by microorganisms.

DISPOSITION OF REFILL USE
It is a violation of Federal Law to use this product in a manner inconsistent with the labeling.
This product is not for use on artificial or semi-artificial medical devices surfaces.

DISINFECTION, DEODORIZING AND CLEANING — Remove visible soil prior to application of the product. Hold container six to eight inches from surface to be treated. Spray area until it is covered with the solution. Allow product to penetrate and the surface to remain wet for 3 minutes (for Bloodborne Pathogens: allow surface to remain wet for HIV-1 1 minute and for HBV and HCV 5 minutes). No scrubbing is necessary. Wire-off with a clean cloth, mop or sponge or allow to dry. The product will not leave grit or soap scum.

One-step cleaning and disinfecting of toilet bowls and urinals: Remove water from bowl by forcing water over trap with a swab mop applicator. Press swab mop against side of the bowl to remove excess water from applicator. Apply 1 to 2 ounces of United 282 evenly, so that sufficient time for product to cover entire surface of bowl for maximum cleaning. Swab bowl completely using a scrub brush or toilet mop, making sure to get under the rim. Let stand for 3 minutes (for Bloodborne Pathogens: allow surface to remain wet for HIV-1 1 minute and for HBV and HCV 5 minutes) and for Bloodborne Pathogens: allow surface to remain wet for HIV-1 1 minute and for HBV and HCV 5 minutes) and for Bloodborne Pathogens: allow surface to remain wet for HIV-1 1 minute and for HBV and HCV 5 minutes) and for Bloodborne Pathogens: allow surface to remain wet for HIV-1 1 minute and for HBV and HCV 5 minutes) and for Bloodborne Pathogens: allow surface to remain wet for HIV-1 1 minute and for HBV and HCV 5 minutes). Wire-off with a clean cloth, mop or sponge or allow to dry. The product will not leave grit or soap scum.

To disinfect food service establishments food contact surfaces:
Before using United 282 food products and packaging materials must be removed or cleaned and protected. For countertops, appliances, tables, hold container six to eight inches from the surface to be treated and spray area until it is covered with the solution. Allow product to penetrate and the surface to remain wet for 3 minutes (for Bloodborne Pathogens: allow surface to remain wet for HIV-1 1 minute and for HBV and HCV 5 minutes) and for Bloodborne Pathogens: allow surface to remain wet for HIV-1 1 minute and for HBV and HCV 5 minutes). Wire-off with a clean cloth, mop or sponge or thoroughly rinse all surfaces in the area with potable water. Visibly soiled areas must be pre-cleaned before using this product.

To disinfect food service establishment food contact surfaces: Before using United 282 food products and packaging materials must be removed or cleaned and protected. For countertops, appliances, tables, hold container six to eight inches from the surface to be treated and spray area until it is covered with the solution. Allow product to penetrate and the surface to remain wet for 3 minutes (for Bloodborne Pathogens: allow surface to remain wet for HIV-1 1 minute and for HBV and HCV 5 minutes). Wire-off with a clean cloth, mop or sponge or thoroughly rinse all surfaces in the area with potable water. Visibly soiled areas must be pre-cleaned before using this product.

FIRST AID
If swallowed:
Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses (if worn) and continue to rinse eye for at least 1 minute. If person is not breathing, call a poison control center or doctor immediately for further treatment advice. Have person sip plenty of water if he/she is able to do so. Do not induce vomiting unless instructed to do so by the poison control center or doctor. Do not give any kind of milk to an unconscious person.
Inhalated:
If you have the product container or label with you when calling a poison control center or doctor, for further treatment advice.

CAUTION
Kills HIV, HBV and HCV on Pre-Cleaned Environmental Surfaces/Objects Previously Soiled with Blood/Blood Fluids in health care settings (Hospitals, Nursing Homes) or other settings in which there is an expected likelihood of soiling of inanimate objects with blood or body fluids, in which the surfaces/object(s) likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS), Hepatitis B Virus (HBV), and Hepatitis C Virus (HCV). Special Instructions for Cleaning and Decontamination Against HIV-1, HBV and HCV on Surfaces/Objects Soiled with Blood/Blood Fluids. Personal Protection: When handling items soiled with blood or body fluids: use disposable latex gloves, gowns, masks, and eye covering.
