

UNITED

LABORATORIES

United 335 FRESH AIR™ Air Handler Deodorizer utilizes United's Fresh Air™ Technology to effectively eliminate bad odors from air handling/air conditioning systems and improve indoor air quality.

FRESH AIR™ Air Handler Deodorizer:

- Bio-based and fully biodegradable.
- Earth Smart® Certified.
- Easy-to-use.
- Available in two sizes.

With United's Fresh Air™ Technology, this product will provide the aromatherapy benefits of peppermint oil through your facility, while eliminating other malodors. Peppermint oil has long been used to temporarily relieve headaches and tension, increase alertness and energize.

This product also provides the aromatherapy benefits of Lemon-Coconut. Formulated with essential oils, that calm, relax, elevate mood and increase alertness and concentration.

United's smaller sized block of approximately 2 pounds will deodorize a 15 ton system for 5 – 6 weeks. The larger sized block, approximately 8 pounds, will last for up to 12 weeks.

Place blocks in air handlers or air conditioners at point where air is pushed out through the system. Place in drip pans and other ductwork throughout the facility for maximum effect.

DIRECTIONS:

Remove the lid of the product container. Loosely hold the lid to the top of the container and then turn upside down allowing the block to slide out of the container and sit on the lid. Place product where desired throughout the air handling system.

United 335

FRESH AIR™ Air Handler Deodorizer

Available in
LEMON COCONUT and PEPPERMINT
