UNITED
LABORATORIES

FRESH AIR™ PREVAIL™ helps you to prevail in the battle against mosquitoes, ticks and more. The DEET-free formula is gentle and safer in use than DEET insect repellents. Contains no artificial fragrances or synthetic pesticides.

KEEP OUT OF REACH OF CHILDREN

FIRST AID TREATMENT: Avoid eye contact. If eye contact occurs, rinse thoroughly with water for 15 minutes. If irritation persists, seek medical attention. Do not ingest. May cause gastrointestinal irritation with nausea and diarrhea.

DIRECTIONS FOR USE: SHAKE WELL BEFORE USE AND WHILE APPLYING THIS PRODUCT.

Never use repellents over cuts, wounds, or irritated skin. Do not apply near eyes and mouth, and apply sparingly around ears. When using sprays, do not spray directly into face; spray on hands first and then apply to face. Apply only to exposed skin and/or clothing. Do not use under clothing. Heavy application and saturation is unnecessary for effectiveness; if biting insects do not respond to a thin film of repellent, apply a bit more. After returning indoors, wash treated skin with soap and water or bathe. This is particularly important when repellents are used repeatedly in a day or on consecutive days. Also, wash treated clothing before wearing it again. If after application you feel irritation, wash thoroughly with soap and water, discontinue use. If irritation continues see a physician.

Remove protective cap, point spray valve in direction of arrow. Press valve button to spray.

Hold can 6–8 inches from skin or clothing while spraying.
