1. PRODUCT AND COMPANY IDENTIFICATION

Product identifier
Product Name United 121 DEEP DOWN DEODORANT

Other means of identification
SDS# UNITED 121

Recommended use of the chemical
And restrictions on use
Recommended use Foaming Carpet Deodorizer
Uses Advised Against For industrial and institutional use only.

Details of the supplier of the safety data sheet
Company Name United Laboratories, Inc.
320 37th Avenue
St. Charles, IL 60174
www.unitedlabsinc.com
www.unitedlabsinc.ca

Emergency telephone number
Emergency Telephone 800-323-2594 (to reorder)
INFOTRAC 1-800-535-5053 (North America)
1-352-323-3500 (International)

2. HAZARDS IDENTIFICATION

Classification

OSHA Regulatory Status
This chemical is considered hazardous by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200)

<table>
<thead>
<tr>
<th>Hazard</th>
<th>Category</th>
</tr>
</thead>
<tbody>
<tr>

Label elements

Emergency Overview

Danger

Hazard statements
Extremely flammable aerosol. Harmful to aquatic life. Harmful to aquatic life with long lasting effects.
Appearance Clear- yellow  Physical state Aerosol  Odor Citrus

Prevention
Keep away from heat/sparks/open flames/hot surfaces. No smoking. Do not spray on an open flame or other ignition source. Pressurized container: Do not pierce or burn, even after use. Avoid release to the environment.

Response
Wash hands thoroughly after handling.

Storage
Protect from sunlight. Do not expose to temperatures exceeding 50°C/122°F.

Disposal
Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC)
None known.

Supplemental information
16.89% of the mixture consists of component(s) of unknown acute hazards to the aquatic environment. 16.98% of the mixture consists of component(s) of unknown long-term hazards to the aquatic environment.

4. FIRST AID MEASURES

First aid measures

Skin Contact
Immediately take off contaminated clothing. Immediately flush skin with plenty of water. Get medical attention immediately. Get medical attention if irritation develops and persists. For minor skin contact, avoid spreading material on unaffected skin. Wash clothing separately before reuse.

Eye contact
Immediately flush eyes with plenty of water for at least 15 minutes. Remove contacts lenses, if present and east to do. Get medical attention immediately.
**Inhalation**

If symptoms develop move individual to fresh air. Oxygen or artificial respiration is needed. Do not use mouth-to-mouth method if individual inhaled the substance. Call a poison control or physician immediately. Induce artificial respiration with the aid of a pocket mask equipped with one-way valve or other proper respiratory medical device. Get medical attention if symptoms persist.

**Ingestion**

Have individual rinse mouth thoroughly with water. Get medical attention immediately. Do not induce vomiting without medical advice. If vomiting occurs naturally, have individual lean forward to reduce risk of aspiration. Do not use mouth-to-mouth method if individual ingested the substance. Induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. If ingestion of a large amount does occur, seek medical attention.

**Most important symptoms and effects, both acute and delayed**

Direct contact with eyes may cause temporary irritation.

**Indication of any immediate medical attention and special treatment needed**

Provide general supportive measures and treat symptomatically. Symptoms may be delayed.

Immediate medical attention is required. If you feel unwell, seek medical advice (show label where possible). Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

---

**5. FIRE-FIGHTING MEASURES**

**Suitable extinguishing media**

Carbon Dioxide, Dry Chemical, Water Spray and Regular Foam.

**Unsuitable extinguishing media**

Water jet, as this will spread fire.

**Specific hazards arising from the chemical**

Contents under pressure. Pressurized container may explode when exposed to heat or flame. Fire may product irritating, corrosive and/or toxic gases.

**Protective equipment and precautions for firefighters**

Firefighters must use standard protective equipment, including flame retardant coat, a helmet with face shield, gloves rubber boots, and in enclosed spaces, a SCBA. Firefighters should wear full protective clothing including self-contained breathing apparatus. Structural firefighter’s protective clothing will only provide limited protection.

**Fire-fighting equipment/instructions**

In the event of a fire and/or explosion do not breathe fumes. Wear full protective clothing, including helmet, self-contained positive pressure or pressure demand breath apparatus, protective clothing and face mask. Withdraw immediately in case of rising sound from venting safety devices or any discoloration of tanks due to fire. Move containers from fire area if you can do at no risk. Containers should be cooled with water to prevent vapor pressure build up.

**Specific Methods**

Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from area if you can do so at no risk. In the event of a fire, cool tanks with water spray. In the event of fire and/or explosion do not breathe fumes.

**General fire hazards**

Extremely flammable aerosol.

---

**6. ACCIDENTAL RELEASE MEASURES**

**Personal precautions, protective equipment and emergency procedures**
Personal precautions

Keep unnecessary personnel away. Consider initial downwind evacuation for at least 500 meters (1/3 miles). Keep people away from an upwind of spill/leak. Wear appropriate protective equipment. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. For personal protection, see Section 8 of the SDS.

Environmental precautions

Avoid release to the environment. Inform appropriate managerial or supervisory personnel of the environmental releases. Prevent further leakage or spillage if safe to do so. Avoid discharge into drains, water courses or onto the ground.

Methods and material for containment and cleaning up

Methods for containment

Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). Prevent entry into waterways, sewers, basements or confined areas. Keep combustibles (wood, paper, oil, etc.) away from spilled material. Stop leak if you can do so at no risk.

Methods for cleaning up

Move the cylinder to a safe and open area if the leak is irreparable. Isolate area until has dispersed. Dike the spilled material, where this is possible. Clean contaminated surface thoroughly. For waste disposal, see Section 13 of the SDS. This material and its container must be disposed of as hazardous waste.

7. HANDLING AND STORAGE

Precautions for safe handling

Advice on safe handling

Will ignite if exposed to intensive heat or open air. Vapors may form explosive mixtures with air. May be ignited by open flame. Pressurized container: Do not pierce or burn, even after use. Do not spray on a naked flame or any other incandescent material. Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill, grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used when handling the product must be grounded. Do not re-use empty containers. Use adequate ventilation. Do not breathe gas/fumes/vapor/spray. Do not get material in eyes or contact with skin. Avoid prolonged exposure. Do not get this material on clothing. Wear SCBA and protective suit. Wear appropriate personal protective equipment. Wash thoroughly after handling. Avoid release into environment. Observe good industrial hygiene practices. Keep out of reach of children. Level 1 Aerosol.

Conditions for safe storage, including any incompatibilities

Storage Conditions

Pressurized container. Do not puncture, incinerate or crush. Do not expose to direct sunlight, exceeding 50°C/122°F. Store in well-ventilated area. Do not handle or store near an open flame, heat or other sources of ignition. This material can accumulate static charge which may cause spark and become an ignition source. Storing in a cool place is recommended. Store away from incompatible materials, (see Section 10).

Incompatible materials

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure Guidelines

No Exposure limits noted for ingredient(s).

NIOSH IDLH  Immediately Dangerous to Life or Health
Appropriate engineering controls

Engineering Controls
Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Ensure adequate ventilation, especially in confined areas.

Individual protection measures, such as personal protective equipment

Eye/face protection
Face shield. Avoid contact with eyes.

Skin and body protection
Wear appropriate chemical resistant gloves. Avoid contact with skin. Wear chemical protective equipment that is specifically recommended by the manufacturer. If may provide little or no thermal protection.

Respiratory protection
Wear a NIOSH approved mechanical filter/organic vapor respiratory protection if listed exposure limits are exceeded.

Thermal hazards
Wear appropriate thermal protective clothing, when necessary.

General Hygiene
Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Avoid contact with eyes and skin. When using do not smoke. Routinely wash work clothing and protective equipment to remove contaminants.

## 10. STABILITY AND REACTIVITY

### Reactivity
This product is stable and non-reactive under normal conditions of use, storage and transport.

### Chemical stability
Risk of ignition. Risk of explosion. No hazards to be especially mentioned. Stable at normal conditions. Unstable.

### Possibility of Hazardous Reactions
Hazardous polymerization does not occur.

### Conditions to avoid
Heat, sparks, and flames. Exposure to air. Avoid temperatures exceeding the flash point. Contact with incompatible materials.

### Incompatibility:

### Hazardous Decomposition Products
May include oxides of oxides of carbon. May include oxides of phosphorus. No hazardous decomposition products are known.

## 11. TOXICOLOGICAL INFORMATION

*Estimates for product may be based on additional component data not shown.

#### Skin irritation
Not expected to be hazardous by OSHA criteria. Not applicable.

#### Eye damage/eye irritation
Direct contact with eyes may cause temporary irritation.

#### Respiratory Sensitization
None known.

#### Skin Sensitization
This product is not expected to cause skin sensitization.

#### Reproductive toxicity
Possible reproductive hazard. Not expected to be hazardous by OSHA criteria.
12. ECOLOGICAL INFORMATION

Ecotoxicity
Harmful to aquatic life with long lasting effects.

Persistence and degradability
No information available on the degradability of this product.

Bioaccumulation
No information available.

Soil Mobility
No information available.

Other adverse effects
No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. DISPOSAL CONSIDERATIONS

Waste treatment methods

Disposal of wastes
Disposal should be in accordance with applicable regional, national and local laws and regulations. Contents under pressure. Dispose of this material and its container at hazardous or special waste collection point. Do not puncture, incinerate or crush. This material and its container must be disposed of as hazardous waste. Incinerate the material under controlled conditions in an approved incinerator. Do not allow material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or container.

US RCRA Status
Waste likely considered (D001) ignitable waste.

Waste from residues/unused products
Dispose in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (See disposal instructions).

Contaminated packaging
Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container is emptied. Do not re-use empty containers.

14. TRANSPORT INFORMATION

This product meets the exception requirements of Section 173.306 as a limited quantity and may be shipped as a limited quantity. Until 12/31/2020, the “Consumer Commodity-ORM-D” marking may still be used in place of the new limited quantity diamond mark for packages of UN 1950 Aerosols. Limited quantities require the limited quantity diamond mark on cartons after 12/31/2020 and may be used now in place of the “Consumer Commodity ORM-D” marking and both may be displayed concurrently.
